

EMPTY CONTAINER HANDLER

- VOLVO engine with excellent performance, low fuel consumption, big low-speeding output torque, satisfying strict emission regulation.
- DANA 32000 Series automatic powershift transmission with declutch or inching function.
- KESSLER heavy duty hub reduction drive axle with zero maintenance wet-disc brakes, reliable hydraulic brake system with forced cooling system,
- ELME 588 Spreader has a low profile single type main frame which enhances visibility when high stacking. Electrical systems monitor the state of the spreader at all times
- Ultra-wide clearview lift mast with stiff contruction in torsion provide smooth lifting and lowering. Special fast-lifting system take full use of the hydraulic

system to increase the lifting speed.

- A multifunction single hydraulic control lever provide all load control movements, easy and convenient.
- Reliable hydraulic manipulator make excellent speeding-up of engine and convenient operation.
- Hydrostatic power steering with load sensing provide smooth power steering.
- Electric system constantly monitor the components and show the fault. Comprehensive instrumentation provide clear information and easy maintenance.
- Fully adjustable suspension-type seat is standard. Operator controls satisfy the ergonomic standards and have all been easy, effortless operation. High-mounted cabin prodived excellent all-round visibility. Air conditioner is standard.
